

--- ADDENDUM #1 ---

Issued April 21, 2023 to all bidders

To be added to and made part of the Tender Documents

1.0 Intent

- .1 This addendum is issued prior to closing of bids to provide revisions to the tender documents.
- .2 Such revisions shall form part of the Tender Documents and change the original Tender Documents only in the manner and to the extent stated. **A signed copy of this addendum must be attached to the Bid and the Bidder must acknowledge receipt of this addendum in the space provided.**
- .3 The statements below are for clarification purposes in response to questions received from bidders.

2.0 Directive

- .1 Bidders are instructed to delete the contents of the “Center and Edge Line Equipment” subsection within Part 5 – Specifications, and replace with the following:
 - The vehicle and equipment that will apply pavement markings under this contract shall be:
 - i. Self-propelled and compliant for on-highway use;
 - ii. Controlled by independent operators for vehicle and painting operations;
 - iii. Capable of applying specified products in accordance with the specified product manufacturer’s recommendations;
 - iv. Capable of heating the paint and maintaining a temperature, during spraying operations, sufficient to enable it to dry when applied to the road in a time frame short enough to avoid the use of traffic cones for protections of vehicles and the painted lines themselves;
 - v. Fabricated from materials that will not contaminate the products being applied;
 - vi. Equipped with a pressurized glass bead dispenser capable of applying overlay glass beads at the required rate;
 - vii. Capable of applying a uniform stripe to the required widths and thicknesses, with sharp edges and without splatter or overspray, and shall provide markings in accordance with the MUTCD;
 - viii. Equipped with painting controls capable of adjusting the length of dashed lines by advancing or delaying application cycle to match length of dashed lines being repainted;
