

Notice of Water Main Flushing June 8th, 2026 – June 19th, 2026

The Town of Wolfville wishes to inform residents that flushing of water mains is scheduled this year from Monday, June 8th 2026 to Friday, June 19th 2026. This process is necessary maintenance of the water distribution system throughout the Town.

This is a proposed schedule of areas we will be working in each day. The schedule can be affected by weather or other operational issues and therefore is subject to change.

During flushing, residents may experience discoloured water or low water pressure. If you experience discoloured water, simply flush your system by running the cold water for several minutes. This will help eliminate any dirt and/or air that may have gotten into the system during the flushing process. It is best to flush through a tap without a strainer such as a bathtub or outside hose bib.

If you have any questions or concerns related to the interruption, please contact the Wolfville Public Works Department at 542-5767, Option 1. The Town of Wolfville apologizes for any inconvenience this may cause.
